

Revyform[®] h₂

Administration is allowed only by specialized medical personnel

Each pack contains 2 pre-filled syringes of 2.5 ml each

Composizione: Sodium hyaluronate 18 mg/ml, CaHA hydroxylapatite 0.01%, Glycine and L-Proline

Medium molecular weight: deep stimulation and superficial hydration

medical device class III
CE 0373

STERILE

Peptyform[®] 2%

Administration is allowed only by specialized medical personnel

Each pack contains 2 pre-filled syringes of 2.5 ml each

Composizione: Sodium hyaluronate, L-hydroxyproline, L-proline, L-lysine, Glycine, Sodium phosphate monobasic monohydrate, Sodium phosphate dibasic, wfi grade water

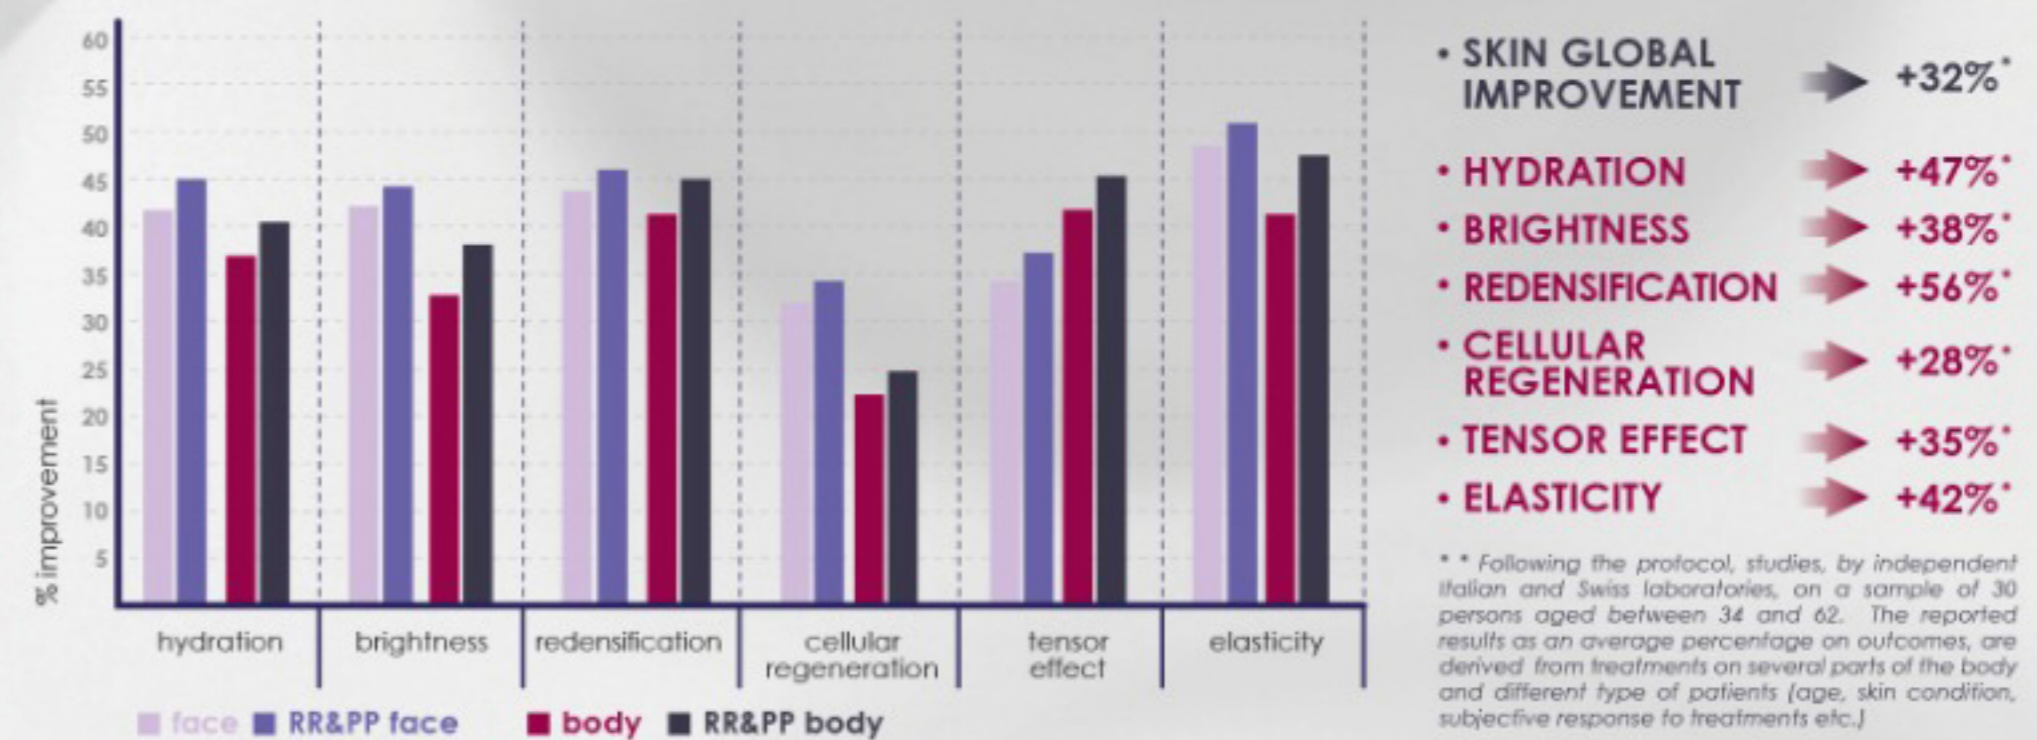

Medium / high molecular weight: tensor, protective effect, excellent hydration, new collagen formation

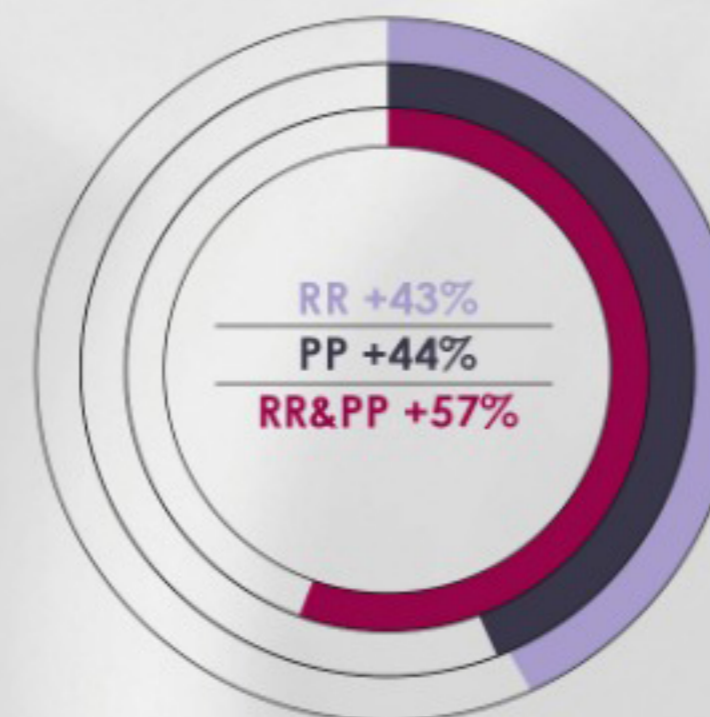

medical device class III
CE 0373

STERILE

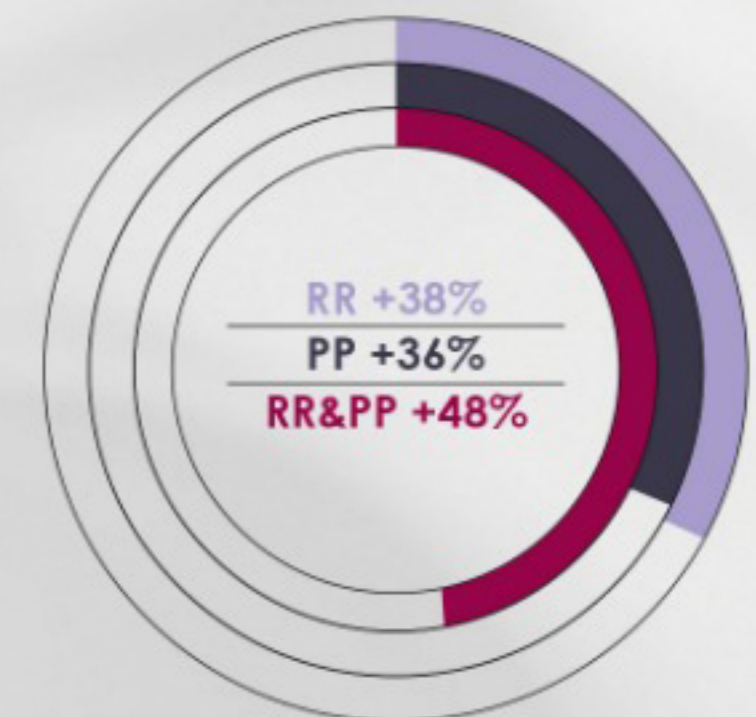

THE USE OF BOTH FORMULAS IN THE TREATMENT PROVIDES CONTINUOUS STIMULATION TO FIBROBLASTS RESPONSIBLE FOR COLLAGEN AND ELASTIN PRODUCTION

REHYDRATION

TONING

■ Revyform h₂ ■ Peptyform 2% ■ Revyform h₂ & Peptyform 2%

Revyform H2 and Peptyform 2% contain one of the highest concentrations of hyaluronic acid in the medical device, perfect for rehydration and toning of skin tissues.
